

# Event Fencing

The Liniar Event Fencing System is not only suitable for 'events' but is ideal for any occasion where a decorative, free-standing temporary fencing system is required.

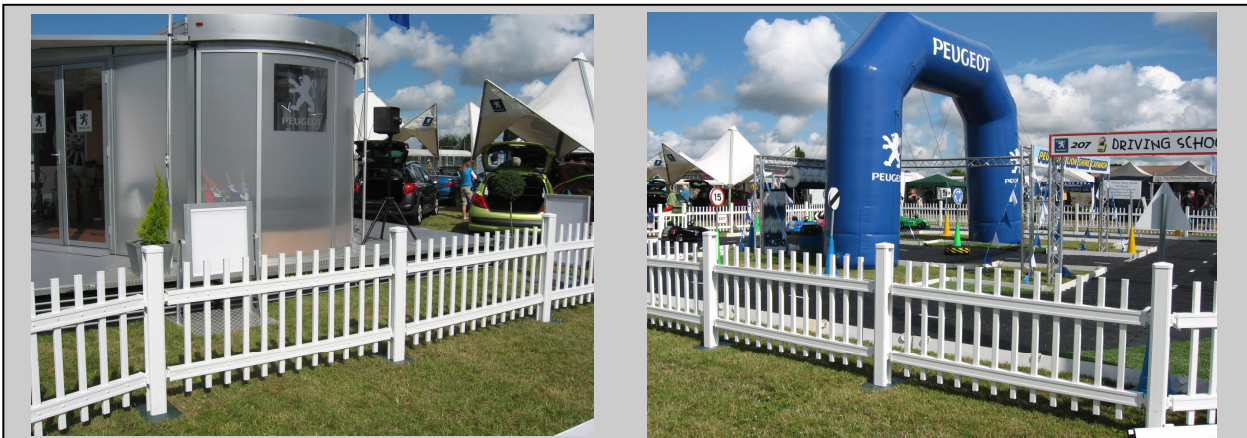

For example, definition of restricted/unrestricted areas, demarcation of boundaries, queuing systems etc or just simply to add aesthetic appeal.

This white picket-style fencing is manufactured from uPVC and is easily and quickly assembled/dismantled.

It is suitable for both indoor and outdoor use and furthermore it is low maintenance and only requires the occasional cleaning with a mild detergent.

All panels are supplied in 2.0 metre runs as standard and, when assembled, are 1.0 metre high. Alternative heights are available but only on request.

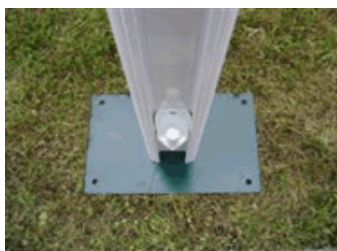

Panels hook onto post brackets for quick and easy assembly

Bracket assembly allows panels to pivot to create angles/corners without the need for an intermediate post

Choice of 4 styles of picket tops

Posts slot onto a green steel base plate for stability. Base plates have pre-drilled holes to allow for extra staking into soft ground

Stringer rails are reinforced with steel for additional strength.

Domed screw caps hide unsightly screw heads and add a feature to the stringer rails
