

## Verandahs and Sun Decks for Static Caravans and Holiday Homes

Extra Freedom, No Maintenance, Contemporary Outdoor Living

## caravan verandahs enhance your outdoor space

Increase your living space and extend your caravan into the fresh air with a verandah and decking system from Liniar. The Liniar name has become synonymous with manufacturing quality installations for park home and holiday caravan sites.

Install a decking area and increase your available living space by up to 50%. Use the extra space to suit your lifestyle; lounge in the sun, dine outdoors, relax with a book or simply watch the world go by.

Take advantage of the long summer evenings and view the sunset with a chilled glass of wine, or invite friends and family over for a meal in the open air.

The Liniar range of PVCu caravan verandah and decking systems offer a maintenance free solution to your outdoor living needs. The PVCu system contains waterproofing properties and the decking is manufactured with an anti-slip tread for additional safety.

All our systems are professionally fitted by an approved installer via our nationwide network.

## sit back, relax and enjoy the views...

Create your own individually designed verandah and enjoy the benefits of an outdoor living area.

The Liniar decking system has been developed to provide bespoke solutions based on available space and the surrounding landscape. Simply call your local installer who will produce a design plan based on your exact requirements.

Liniar offers a wide range of accessories to add the finishing touches to your deck, see inside for more details.

All Liniar products are manufactured in the UK and many are produced using a high percentage of recycled materials.

All decks are fitted to galvanised steel subframes, which are extremely sturdy and offer more fire resistance than traditional materials.

Additionally, our PVCu components carry a Class 1Y fire rating for surface spread of fire.

## bespoke design customised accessories

choice of colours

Liniar caravan verandah systems are available in a choice of four colours – white, beige, green or brown – a unique concept in the marketplace. The coloured fencing and decking can be mixed to create your own co-ordinated customised design, and differentiate your property from those around you. The PVCu is colourfast, ensuring it retains its attractiveness over years to come.

## steps, ramps and gates

There is a choice of steps, ramps and gates to provide you with ease of access and additional security. A set of steps enhances the appearance of your verandah and creates an attractive, personalised entrance, whilst ramps provide a gradual incline, which are particularly suited for disabled access. A locking gate adds an element of privacy and security, particularly for those with children and pets.

Plain

Gothic

Acorn

Coach

Globe

## customised accessories

You can customise your Liniar verandah with our range of accessories. The balustrade fencing system post caps are available in three styles – plain, gothic or acorn – to add a striking effect to the finished verandah. To add that extra touch and allow you to use your outdoor space for evening entertaining, Liniar offer a choice of two lights – coach or globe – which fit onto the post caps.

To accessorise your systems further, wrought iron scrolls can be fitted between the balustrade.

Skirting can be fitted below the verandah to hide the underneath of the caravan and provide a degree of insulation and additional storage space.

For more information contact your local stockist (see back page for details)

Some of the photography featured in this brochure has been supplied from Liniar approved stockists. Therefore, some components may differ slightly from items illustrated.

Your local Liniar stockist:

All installers of Liniar products are independent companies and whilst we will periodically monitor installers' performance, Liniar cannot give any contractual guarantees in respect of installation standards. In the unlikely event that you encounter any problems with an installation of Liniar products please contact our customer service department, who will endeavour to assist you.
