

## Fencing systems - posts and gravel boards

Whether you're looking for a standard garden fence, a picket fence border or something more bespoke, Liniar's stylish PVCu fencing systems offer a strong, attractive and low-maintenance alternative to more traditional fencing products.

Liniar fence posts and gravel boards are installed in exactly the same way as concrete or timber, but offer a much more durable solution - with the added bonus of not requiring painting each year.

### Why Liniar PVCu fencing?

- Lightweight - easy to transport and carry
- Easy to install - no specialist equipment required
- Compatible with other fencing systems - so you can use timber panels
- Will never rot or rust - completely weatherproof
- Eco-friendly - manufactured from post-industrial recycled products
- Strong - can withstand storm force winds
- Child friendly - no risk of splinters
- Low maintenance - just wipe with soapy water to clean - no painting necessary
- Durable - will not crack, break or corrode

\* available in 8' and 9' length posts only

### Personalised for your living space

Liniar fencing systems are available in white, brown and green, and can be mixed and matched with deck boards, handrails and balustrades for a completely bespoke installation.

Add accessories to personalise your Liniar fencing, with decorative post caps and lamps available as part of the range.

And because we design and manufacture all Liniar products at our factory in the heart of the UK, if you have something specific in mind, please talk to us - we love to come up with innovative solutions for your challenges.

# Fencing systems - picket fencing

Liniar's versatile fencing range includes white picket fencing, available in pre-fabricated panels. All you need to decide is whether you need a permanent installation or the flexibility of temporary fencing that can be used again and again.

## Boundary fencing

For permanent fencing providing strong and attractive boundaries for sporting facilities, paddocks, holiday parks or theme parks, our standard picket fencing is ideal. Easy to transport and carry and with no specialist equipment required for installation, Liniar's white picket fencing is supplied in ready-assembled panels of 2m wide – just fix to our steel-reinforced posts for extra strength.

## Event/Temporary fencing

If your fencing requirement is short-term or temporary – maybe you need to fence off a queue, a Christmas tree, a music festival or a café seating area – then Liniar's free-standing event fencing is perfect for you.

If your fencing need is short-term or seasonal, then our decorative free-standing temporary event fencing is perfect for you. The white picket panels are supplied as above, but simply hook onto free-standing post brackets for quick and easy assembly. The unique bracket allows panels to pivot, creating angles or corners without the need for an intermediate post.

The posts slot onto a steel base plate for stability and rails are reinforced with steel for additional strength and durability. You'll be able to use Liniar event fencing year after year with very little maintenance required – just an occasional wash with hot soapy water.

## The highest quality

Made from lead-free window grade durable PVCu, Liniar picket fencing is designed and manufactured at our Derbyshire factory, complete with ISO 9001 accreditation. Not only do you get the best deal by buying directly from the manufacturer, you can rest assured that our quality systems and customer care are second to none, so if you ever have a problem, we'll be there at the end of the telephone.

## Mix and match

All of Liniar's fencing products can be mixed and matched, so if you have a specific fencing challenge or requirement, please give us a call – we're great at coming up with clever solutions! Read our case study at <http://bit.ly/LiniarTP> to find out how we helped a holiday park with their fencing needs by creating a bespoke fencing panel that combines our post and gravel boards with picket fencing.
