

Why choose Liniar roofline?

Fully matching appearance

Made from the same lead-free PVCu as innovative Liniar windows, doors and roofs, installers can now offer a perfect colour match. Mouldings are also foiled for a perfect finish to installations.

Wide range

The comprehensive range incorporates capping and replacement fascias, foam and hollow soffits, a full set of associated trims and mouldings, ventilation options and dry verge.

Thicker and stronger

At 20mm thick, Liniar's fascia boards provide greater strength than other brands - with no warping or flexing giving a smooth line and sturdy finish.

Great value

Pricing is competitive, with Liniar 20mm boards priced similar to others' 16mm boards. Compare the quality with weaker boards that make fitting more challenging.

Technically advanced

Liniar boards are manufactured using the latest advancements in extrusion equipment and technology to provide a consistent thickness of board with improved flatness.

Easy to fit

Longer return legs and extra cover on mouldings assist with fitting, with pre-marked protective tape making it easy to find the centre line for the rafter end. Straight cuts are guaranteed.

Hollow soffit

The hollow soffit has a sturdier feel than many on the market. It comes with protective tape, a key benefit to the installer, with a double skinned fixing location to give the installer a solid installation.

Beautiful colours

Liniar's factory fitted foils offer a woodgrain or smooth finish in a huge range of colours. High quality foils won't peel or scratch off, giving an easy clean, low maintenance appearance.

Corners

Liniar corners are a perfect match to the boards. They are 50mm instead of the standard 40mm that many stockists offer, again giving the installer a great finish.

Designed by experts

The whole Liniar range is designed, manufactured and tested by a team with over 500 years' experience within the window and construction industries.

British made

Designed and extruded in Derbyshire at the HL Plastics manufacturing plant, which boasts the largest mixing plant in the UK. Continued investment in facilities keeps Liniar at the forefront of innovation.

Guaranteed

All Liniar PVCu profiles come with a 10 year guarantee against cracking, warping or discolouration.

Your Liniar stockist is:

7 great reasons to choose Liniar

Innovative – with continuous investment in R & D, there's always something new from Liniar

Energy efficient – designed from scratch to achieve the pinnacle of thermal performance and retain more heat in your property
