

Why choose Liniar patio doors?

Technically advanced

The Liniar sliding patio door is the most modern and up-to-date on the market - built for today's exacting challenges.

British made

Liniar profiles are extruded in Derbyshire at a state of the art manufacturing facility, which boasts the largest mixing plant in the UK. Continued investment in the factory and facilities keeps Liniar at the forefront of innovation.

Low threshold options

Liniar's thermally broken low threshold offers easy access for family living. The low threshold has an integral ramp outside and offers increased energy performance. An optional integral tray makes it Part M compliant.

Strong and secure

The Liniar patio door features the patented ModLok™ system, a combined reinforcement and multi-point locking system. The system can be manufactured to PAS24/Part Q security accreditations with a set of additional components - ideal for the new build sector.

Fully tested

Not only does Liniar carry out weather testing and security testing, it has invested in a robot for cyclic testing, giving customers peace of mind that their Liniar sliding patio door will endure the rigours of daily living.

Unique 'air glide' system

Other patio doors operate on a two-wheel steel opening system. The Liniar patio features a unique eight-wheel acetal roller system, with a superb load-bearing capacity of up to 120kg per sash providing stability, durability and a smooth, silent 'air-glide' operation.

Self-cleaning track

One of the reasons other patio doors are hard to open is when dirt and mud fall onto the track. The Liniar patio features built-in brushes that sweep the track clean every time the door is opened.

Designed by experts

The Liniar range is designed, manufactured and supported by a team with over 500 years' experience within the window industry.

Attractive

With ultra-slim sculptured sightlines, no unsightly crash stops and a patented built-in decelerator, the Liniar patio door is one of the most attractive on the market.

Thermally efficient

The Liniar patio door range can be double or triple glazed and can achieve a U-value of 1.3W/m²K with economical double glazed units.

Better for the environment

Liniar frames have always been 100% lead-free, well in advance of legislation. Furthermore, all elements of a Liniar patio are fully and easily recyclable at the end of its life.

Beautiful colours

Liniar's coloured foils give the appearance of woodgrain and won't peel or scratch off - and the Liniar patio door matches perfectly with the rest of the Liniar range, offering an easy clean, low maintenance finish.

Guaranteed

Liniar profiles come with a 10 year guarantee against cracking, warping or discolouration, and the ModLok™ locking mechanism includes a 10 year mechanical warranty.

Your Liniar stockist is:

7 great reasons to choose Liniar

Innovative – Liniar’s string of patents and registered designs is testament to its ongoing new product development

Energy efficient – designed from scratch to achieve the pinnacle of thermal performance and retain more heat in your property

Safe and secure – engineered with built-in security features and approved by independent testing facilities, with PAS24 Secure option available

British made – manufactured in our state-of-the-art factory in the heart of Derbyshire

Lead free – all Liniar profiles are extruded using materials that are 100% lead free

Quality assured – backed with ISO 9001 accreditation for your peace of mind

Guaranteed – all Liniar frames are guaranteed to not warp, split or discolour for a minimum of 10 years
