

## New sculptured balustrade system:

### Load test report

Alongside the launch of its new 125mm twin wall sculptured post, Liniar demonstrates the strength of its decking system by loading a 2 metre by 2 metre deck with a total weight of 1250 kg (1.25 tons).

This represents a loading of 521kg per square metre. The load applied was left for 2 days on three different samples.

### Liniar decking systems

- no timber
- no weakness
- no compromise
