## Company introduction

The Liniar brand is owned by HL plastics and has become synonymous with quality and style.

Our products are manufactured in a modern 180,000sq. ft. manufacturing and warehouse facility in the heart of England.

In partnership with our nationwide network of approved installers, we can offer a quality product, the highest attention to design and engineering details and a great level of customer service, all at a competitive price.

We are the only UK decking systems company to offer the complete package - component design, modelling, tooling, production, stocking and delivery.

Our range has been carefully designed and crafted to add real value, functionality and style, whilst also meeting the strictest environmental legislation.

# Specifications

Storage boxes are made from:

- **All Frames**  
Liniar 80mm x 40mm white plastic box profile
- **Walls**  
Liniar 300mm white plastic cladding & edging trim
- **Door & Roof**  
Liniar 300mm white plastic cladding & edging trim
- **Corners**  
Liniar sculptured 125mm x 125mm twin walled white plastic profile
- **All joints are welded or mechanically jointed.**
- **The box will have approx. 70mm fall on the roof.**
- **Doors**  
Stainless steel butt hinges and 3 lever dead lock with 2 keys

All storage boxes should be sited on a solid concrete/slabbed base that is at least 300mm larger than the exterior size of the storage box with an optional OSB plywood floor

Or

Have an OSB plywood floor with the storage box and site on slabs positioned appropriately.

Please note that storage box siting and ground works should be in accordance with the park's rules and regulations.

# Storage **box options**

PVCu storage boxes compliment your verandah, being made from the same maintenance free and fire resistant materials. These can be free standing in several different sizes or built within the decking itself.

## Small

2' (W) x 4' (D) x 4' (H)  
with an opening door on  
the 4' front

## Medium

4' (W) x 4' (D) x 4' (H)  
with an opening door on  
the front

## Large

1 door - 4' (W) x 6' (D) x 4' (H)  
with an opening door on  
the 4' front

2 door - 6' (W) x 4' (D) x 4' (H)  
with 2 opening doors on  
the 6' front

# Storage Box Handling Suggestions

- Boxes should never be lifted by the roof 'overhang'
- Use 2 x timber planks (or similar) to act as 'skids' to allow you to push the box onto/off your vehicle/ trailer
- Get your vehicle as near as possible to required installation site and use 'skid' method to slide the box into place
- Once the box has been sited/installed, care should be taken not to move as this could result in the box becoming 'out of square'.
- Boxes should be left at least 24hrs after installation to allow silicone/ sealants and glues to cure.

## Test reports

The following accreditations & test reports apply to all Liniar components:

- All Liniar components are produced in our own factory to ISO9001:2008
- Fire rating achieves Class 1 Fire Test Certificate to BS476:Part 7:1997

## Guarantees

Liniar PVCu products are manufactured using tried and tested formulations from approved suppliers. We guarantee they will not warp or split for 10 years from the date of installation providing they are installed by a Liniar-approved installer and maintained within our guidelines.

This guarantee is issued in association with our raw material suppliers and is based on proven technology for PVCu products.

Further details can be supplied on request. All Liniar products to be installed to Liniar's recommendations.

# Cleaning & Maintenance

This information should be noted before cleaning to help keep its appearance in optimum condition for many years.

## Do

- ✓ Frequently wash the storage box with a cloth using warm, soapy water and wipe dry
- ✓ A jet wash may be used to clean the storage box

## Don't

- x Use any type of bleach, solvent (e.g. white spirit, methylated spirits, nail varnish remover) or adhesives
- x Use any abrasive brushes or cloths or papers, such as sand paper.

# The Liniar outdoor range

## Piling and retaining systems

The Liniar range of piling is made from recycled PVCu and is available in a variety of styles for different applications. From flood defence to soil retention, utility trench piling to track side shelters for the rail industry, plastic piling is a cost effective alternative to steel or timber. A free CPD training session is available – please contact us.

## Decking

A huge success in the caravan and holiday home industries, Liniar verandah and decking systems are also used for domestic gardens and landscaping applications. Beautifully foiled finishes give the sculptured balustrade system an authentic, maintenance free appearance, and a wide range of accessories is also available.

## Fencing

Liniar's fencing range comprises a fence post and gravel board system, which is surprisingly strong. The steel-reinforced posts are installed in exactly the same way as more unattractive concrete or timber products, whilst offering a more durable and maintenance-free solution.
