

Liniar Approved Fabricator

Non Liniar part approval form

Date of application

Company name

As part of the Liniar Approved Fabricator scheme, I have detailed below a non-Liniar part that we use in our manufacturing process, and which I believe makes commercial sense to do so.

I understand that if the part is not approved by Liniar, any rebate within this category may be affected although my company may still be able to obtain rebates in other categories as an Approved Fabricator.

Full details of the non-Liniar part

Additional information information to support your application
