

# Technical Data Sheet: LINVIS

LINVIS is a lightweight, clear face shield for personal use. It consists of two components which are easily assembled and will create a barrier to help reduce the transmission of bodily fluids as a result of sneezing and coughing.

## Features

- Very lightweight design
- Reusable and easily cleaned
- One size fits all
- Can be worn over masks, glasses and helmets
- Hooked ends enable the addition of elastic for further tension if required
- Weight: 30g

## Product Materials

- Headband – medical grade polypropylene
- Visor – 300 micron clear polypropylene (210mm x 297mm with standard 4-hole punch pattern).
- Both 100% recyclable

## Care

- Dis-assemble visor and clean both parts with warm, soapy water after use.

## Advantages

- Thick headband for increased comfort
- Injection moulded for strength and durability
- Simple to assemble
- Visor can easily be replaced if damaged (A4 clear polypropylene sheet material and 4-hole punch required)
- Resistant to fogging
- Resistant to droplets and splashes

## Packaging

- Supplied in boxes of 25 full units
- Box includes 25x headbands, 25x visors and 1x assembly instructions

## Ordering

- Product code: LINVIS
